Biometrics Services Without the Trade-Offs.

koneksa

Faster delivery, lower cost, and submission-grade quality, together — because our teams run on software we built ourselves.

The largest providers optimize for scale. We optimize for success.

Biometrics usually forces a trade-off between speed, cost, and quality. Our biometrics teams operate as one integrated function on Lodestar™, the validated, 21 CFR Part 11 pipeline we built to power our own biometric operations. ***The result is decision-ready evidence, delivered faster, leaner, with a defensible audit trail at every step.***

- *65% lower* biometrics costs
- *80% less* programming time
- *16X faster* QC cycles
- *100%* Audit-Ready outputs

LODESTAR

Every Data Source, Unified

Unifying the full range of modern trial data into a single validated pipeline. Whether your study generated thousands of data points or millions, we ingest every source:

EDC | ePRO/eCOA | Wearables & Sensors | Imaging | Digital Measures | Laboratories | Real-World Data

One Integrated Biometrics Function

Data Management

Inspection-ready data from protocol through database lock, with continuous cleaning and reconciliation across digital and traditional data streams.

Biostatistics

Analytical strategy aligned to decision needs, so results stay interpretable, defensible, and submission-ready throughout execution.

Statistical Programming

CDISC mapping (SDTM, ADaM) and TLFs produced in tight integration with data management and biostatistics, surfacing insight earlier and cutting rework.

Biometrics Support, Your Way

We run it for you. A full Lodestar™-powered program, from database build through submission-ready deliverables. ***Our team. Our tools. Your data.***

You run the pipeline. License Lodestar™ to give your own teams the same validated pipeline, configured to your protocols and standards. ***Your team. Your environment. Our pipeline.***

We run it together. Embed Koneksa experts alongside your team, scaling support up or down as study complexity changes. ***Your team. Our people and pipeline, where you need them.***

Contact us today to discover biometrics that are faster, leaner, and submission-ready delivered by our team, licensed to yours, or both.
